CEMTREXLABS

**Harvard Med Tech: Meditation phase**
**Moodboard for the Crystal Bay Beach Environment**

## Things that will be added to this version:

Shooting stars

Moving lights in the sky (distant aircraft, satellites etc)

Insect sounds (crickets)

Firefly lights floating around the garden

The moon in the distance

## Lighting

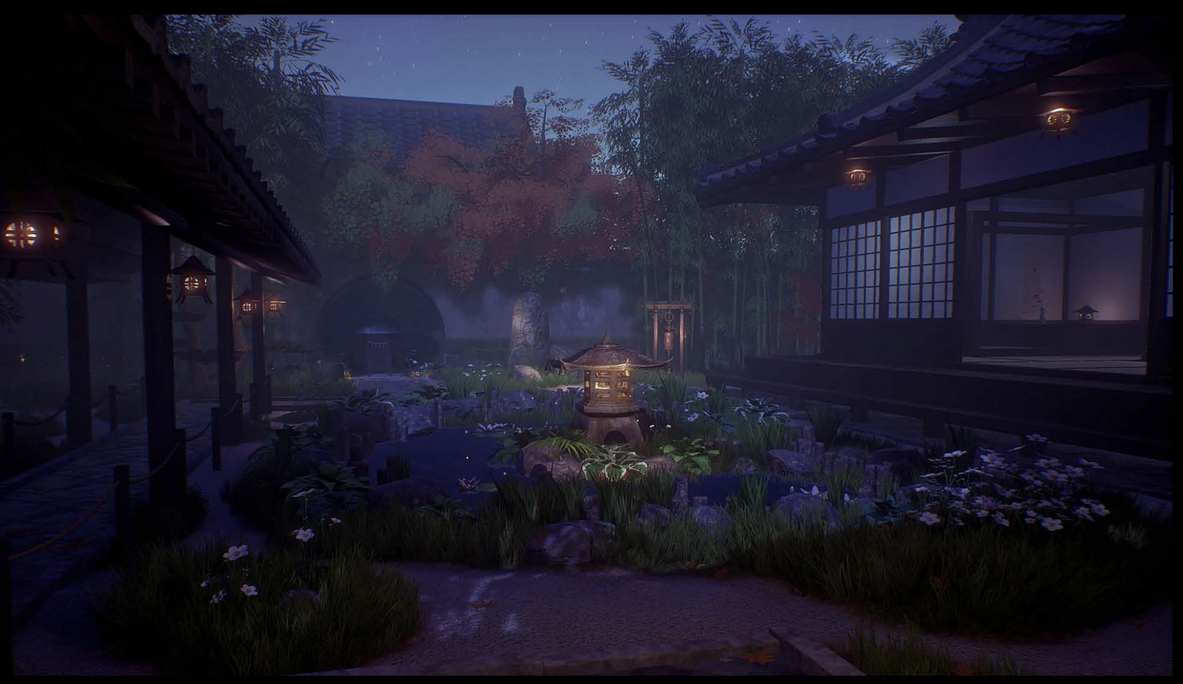
The area around the user will be lit by the two exterior lights on the outside of the front deck.

These two exterior lights will be turned down pretty low, to give the tranquil night vibe we need.

The user will be able to see in detail the few feet in front of them, but the remaining objects will slowly form dark siloettes the further away from the user.

CEMTREXLABS

# Harvard Med Tech: Meditation phase
# Moodboard for the Japanese Zen Garden Environment



## Things that will be added to this version:

Shooting stars

Moving lights in the sky (distant aircraft, satellites etc)

Birds and insect sounds (owls and crickets)

Firefly lights floating around the garden

The moon in the distance

## Lighting

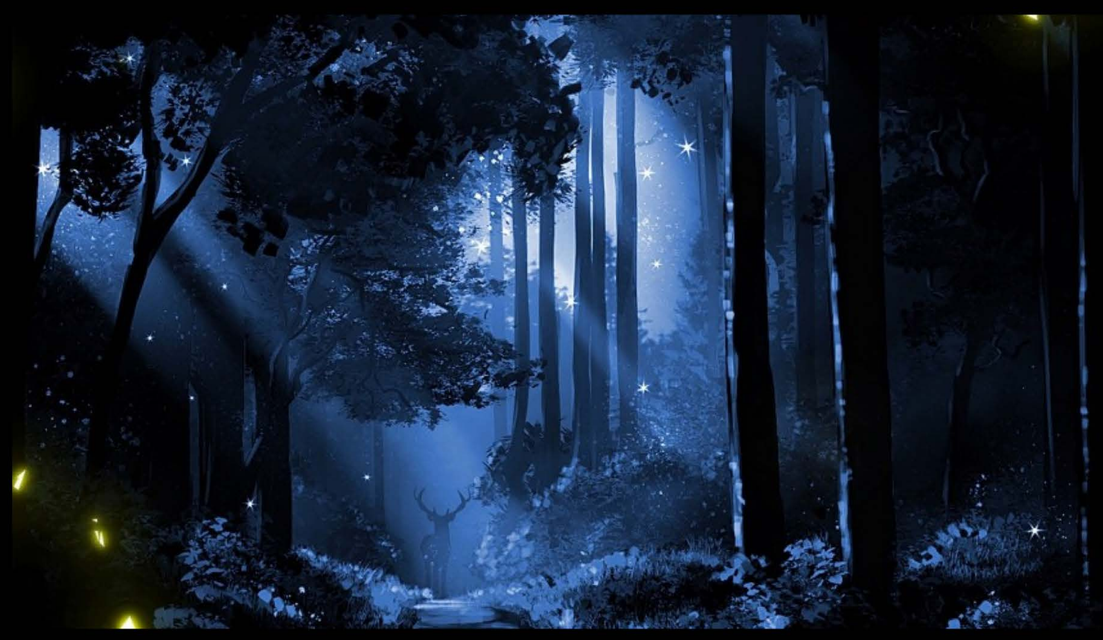
The area around the user will be lit by the interior lights glowing outward from the doorway.

These interior lights will be turned down pretty low, to give the tranquil night vibe we need.

The user will be able to see in detail the few feet in front of them, but the remaining objects will slowly form dark siloettes the further away from the user.

CEMTREXLABS

**Harvard Med Tech: Meditation phase**
**Moodboard for the Log Cabin Environment**



## Things that will be added to this version:

Shooting stars

Moving lights in the sky (distant aircraft, satellites etc)

Insect & bird sounds (crickets and owl)

Firefly lights floating around the woods

The moon in the distance

## Lighting

The area around the user will be lit by the two exterior lights on the outside of the cabin.

These two exterior lights will be turned down pretty low, to give the tranquil night vibe we need.

The user will be able to see in detail the few feet in front of them, but the remaining objects will slowly form dark siloettes the further away from the user.
